

# Online Safety Contract

It's important that everyone can have a good time using the internet and devices. Our family knows we have a responsibility to make things safer for us all. We will agree on some guidelines so this can be done. We agree to:

**1 T.H.I.N.K Before We Click**  
It it *True*? It it *Helpful*? It is *Inspiring*? It is *Necessary*? Is It *Kind*? All of these questions must be 'yes' before we post, tweet, comment, or share online content.

**3 Be Honest.** When we copy or use words, pictures and ideas from the internet, we will share these properly and follow the guidelines for content we didn't develop. This includes providing the name of the author or creator.

**2 Be Private.** We will keep our passwords and information about ourselves and other people safe and private. If we are not sure if it's safe to share, we will check with an adult first.

**4 Be Fair.** We will ask if it's okay to record someone and won't share any photos, video or information about other people without checking if it's alright to do so.

What other guidelines for online safety would you like to include? If any, please write them below
